

MICRO SWITCH™ Premium  
Large Basic Switches  
**BZ | BA | BM | BE | 6AS Series**

# MICRO SWITCH™ Large Premium Basic Switches

Accurate, reliable, and repeatable, MICRO SWITCH™ BZ/BA/BM/BE Series features precise operating characteristics and enhanced life. These premium, large snap-action switches offer precision operation and sensitive differential travel.

Utilizing state-of-the-art manufacturing processes and quality controls, Honeywell has engineered premium, large snap-action switches that meet various international agency requirements. Some models have military qualifications. MICRO SWITCH™ BZ/BA/BM/BE Series are often used for precision on/off applications, as well as end of limit, presence/absence, and manual operator interface functions.

Their engineered design is suitable for various application needs. Configured options with BZ, BA, BM, and BE switches provide a wide variety of operating and interface characteristics.

The MICRO SWITCH™ 6AS Series consists of two large premium BZ/BA/BM/BE snap-action switches ganged together and actuated by a single actuator. Field adjustable operating point is an option for one or both switches.

## *What makes our switches better?*

- Industry-leading temperature range for options up to 204 °C [400 °F] and temperatures as low as -55 °C [-67 °F]
- Exclusive current carrying capability of up to 25 A
- International approvals: UL, CSA, ENEC, CE listings
- Options for circuitry, styles, connection types and a wide selection of actuator styles
- Dependable performance - tested up to 20 million mechanical cycles
- MICRO SWITCH™ legacy and expertise - over 75 years of engineering excellence and experience

*Operating in extreme temperatures is all in a day's work for MICRO SWITCH™ large basics!*

QUALITY • RELIABLE • RUGGED • GLOBAL

# Features and Benefits

## GLOBAL USE AND APPROVALS

Switches certified to **UL, CSA, ENEC, and CE** for global use

## FLEXIBILITY OF PRODUCT CHARACTERISTICS

Honeywell's large basic switches offer various operating force and differential travel options to meet the actuator type. Designed with **momentary or maintained contact action**, these switches may perform a variety of functions as well as offering a choice of actuation, termination and operating characteristics for **design flexibility**

*Listings certified for global use and multiple applications*

## VARIANTS FOR EXTREME CONDITIONS

With an IP64 sealing option to maintain switch enclosure sealing, many listings can be used in dirty, harsh environments with their **dustproof and splash resistant seals**. Many versions operate in extreme temperatures, up to 121 °C [250 °F], and several with high temperature options for up to 204 °C [400 °F], as well as temperatures as low as -55 °C [-67 °F]

## EASY INSTALLATION REDUCES OVERALL COSTS

The switch's elongated mounting hole allows for easier, more accurate mounting

## TIGHT HYSTERESIS/DIFFERENTIAL TRAVEL

Designed with a hysteresis **as small as 0,008 mm [0.0003 in]**, the BZ/BA/BM/BE switches may be used in applications where very tight and sensitive control is required between the operate and release points

*Standardize switching packages*

## CURRENT CAPACITY FROM LESS THAN 1 A TO 25 A

With a broad current capacity, **one switch package can control a wide range of electrical loads**. As requirements vary for applications, a standardized switch package may help reduce costs and increase application flexibility. **Gold contacts** available for controlling low energy/low power circuits

## ENHANCED PERFORMANCE

Internal flat spring design delivers optimum **performance and switch reliability**

## MILITARY APPROVALS

**MIL-PRF-8805** switches available for military-specified applications

## Potential Applications

### **BUILDING CONTROLS AND EQUIPMENT**

Often used in a building's boiler/heater controls, in HVAC systems to sense exhaust pressure on high efficiency furnances, and in fire suppression systems to sound alarm when sprinkler activation/waterflow is detected. May also be used in machine tools to limit the maximum movement for pieces of equipment

### **DOORS AND LIFTS**

May be used in elevators and lifts to sense if the car is in position before the door opens and on door-latching mechanisms to indicate door closed and/or door locked

### **SEMI-TRUCKS AND TRAILERS**

Can be used to disengage the cruise control when the clutch pedal is depressed and for diesel engine brake assist. For surface transportation equipment, can be used as a seat switch

### **VALVES**

Detects whether a valve is "open" or "closed"

### **TIMING DEVICES**

Often used in commercial/industrial-grade timers to turn outputs "on" and/or "off" at preset times

### **COMMUNICATION SYSTEMS**

May be used as a door interlock on communication consoles or enclosures

### **FOOT SWITCHES**

In commercial and industrial foot switch enclosures, may be used as the switching element

### **COMMERCIAL AND INDUSTRIAL KITCHEN EQUIPMENT**

May be used to indicate door closed and/or door locked for the self-cleaning feature

### **IRRIGATION EQUIPMENT**

Often used for limiting maximum offset of irrigation towers

### **MEDICAL INSTRUMENTATION**

In medical and dental equipment, often used in foot switches to control the dental drill and the positioning of the chair

Table 1. Specifications

Characteristic	BZ Series	WZ Series	YZ Series	BA Series	WA Series	YA Series	BM Series	BE Series
								
Ampere rating	15 A			20 A			22 A	25 A
Circuitry	SPDT	SPNC	SPNO	SPDT	SPNC	SPNO	SPDT	SPDT
Operating force	1.0 oz to 28 oz							
Termination	quick connect, solder, screw							
Actuator	pin plunger, overtravel plunger, straight, roller, flexible leaf roller, flexible leaf							
Voltage	125 Vac, 250 Vac, 125 Vdc, 250 Vdc							
Agency approvals	UL, CSA, ENEC, CE (varies by specific model)							
Operating temperature	-55 °C to 85 °C [-67 °F to 185 °F]							
Contacts	silver, silver cadmium oxide, gold alloy							
Housing	general purpose phenolic							
Sealing	Environment sealing option available (options for IP64 Sealing)							
Dielectric strength	2000 V between each terminal and ground							
Contact resistance	15 m Ohm max.(initial)							
Insulation resistance	100,000 M Ohm min.							
Vibration	1,5 mm peak-to-peak amplitude, frequency 10 Hz to 55 Hz, for two continuous hours							
Expected mechanical life	up to 20,000,000 cycles at 95% survival							
Expected electrical service life	100K operations at rated load							
Rated frequency	50 Hz/60 Hz							

## ELECTRICAL DATA AND UL CODES

Table 2. UL Electrical Ratings

Code	Circuitry	Electrical data and UL codes
A	SPDT	15 A, 125, 250 or 480 Vac; 1/8 HP, 125 Vac; 1/4 HP, 250 Vac; 1/2 A, 125 Vdc; 1/4 amp, 250 Vdc. UL Code L96
B	SPDT	5 A, 125, 250 or 480 Vac; 1/2 A, 125 Vdc; 1/4 amp, 250 Vdc. UL Code L35
C	SPDT	10 A, 125, 250 or 480 Vac; UL Code L8
D	SPDT	15 A, 125, 250 or 480 Vac; 1/8 HP, 125 Vac; 1/4 HP, 250 Vac. UL Code L103
E	SPDT	15 A, 125, 250 or 480 Vac; 1/4 HP, 125 Vac, 1/2 HP, 250 Vac; 1/2 A, 125 Vdc; 1/4 amp, 250 Vdc. UL Code L67
F	SPDT	22 A, 125, 250 or 480 Vac; 1/2 HP, 125 Vac, 1 HP, 250 Vac. UL Code L161
G	SPDT	20 A, 125, 250 or 480 Vac; 10 A, 125 Vac “L” (tungsten lamp load); 1 HP, 125 Vac; 2 HP, 250 Vac; 1/2 A, 125 Vdc; 1/4 A, 250 Vdc. UL Code L23
H	SPDT	Motor control - 25 A, 125, 250 or 480 Vac; 1 HP, 125 Vac; 2 HP, 250 Vac; Pilot duty—750 VA, 125, 250, or 277 Vac
I	SPDT	10 A, 125, 250 or 480 Vac; 1/8 HP, 125 Vac; 1/4 HP, 250 Vac; UL Code L95
P	SPDT	1 A, 125 Vac UL Code L22
T	Two-circuit, double break	Motor Control 15 A, 120, 240, 480 or 600 Vac; 1/2 HP, 120 Vac; 1 HP, 240 Vac; 0.8 amp, 115 Vdc; 0.4 amp, 230 Vdc.
W	SPST	20 A, 125, 250 or 277 Vac; 3/4 HP, 125 Vac; 1/2 HP, 250 Vac UL Code L178B
X	SPDT	15 A, 125, 250 or 480 Vac; 2 A, 600 Vac; 1/8 HP, 125 Vac; 1/4 HP, 250 Vac; 1/2 amp, 125 Vdc; 1/4 amp, 250 Vdc. UL Code L74

## GENERAL SWITCH IDENTIFICATION

The first letter in the catalog listing designates:

- B** = Single pole, double throw
- W** = Single pole, normally closed
- Y** = Single pole, normally open

The second letter in the catalog listing designates:

- Z** = Standard, 15 A version
- M** = 22 A version
- A** = Standard, 20 A version
- E** = 25 A version

## MOUNTING DIMENSIONS

Mounting dimensions are included in this datasheet. They are shown in English and metric equivalents. These dimensions are for reference only. Engineering drawings may be accessed via the Honeywell web site: [sensing.honeywell.com](http://sensing.honeywell.com).

Mounting holes for Types BZ, BM, BA, BE, and 6AS switches accept pins or screws of 3,53 mm [0.139 in] diameter.

## RECOMMENDED TORQUE

Mounting screws . . . . . 0,39 Nm [3 in-lb]\*  
Terminal screws . . . . . 0,45 Nm [4 in-lb]  
Panel mount bushing . . . . . 0,45 Nm to 0,68 Nm [4 in-lb to 6 in-lb]

\*Note: Tightening mounting screws above 0,3 Nm [3 in-lb] changes operating characteristics and increases the possibility of cracking the case.

## UL/CSA

Honeywell basic switches are Component Recognized by Underwriters’ Laboratories, Inc. and certified by Canadian Standards Association. The BA, BZ, and BM line is covered as Special Use Switches to UL Standard 1054; the BE line is covered as an Industrial Product to UL Standard 508. Agency File References are:

- BA UL File E12252, issued 12-09-88
- BM UL File E12252, issued 12-08-88
- BZ UL File E12252, issued 6-29-89
- BE-1,2,5 UL File E22779, Vol. 4, Sec. 1
- BE-R UL File E22779, Vol. 4, Sec. 2

## 6AS SERIES - PREMIUM LARGE SNAP-ACTION TANDEM SWITCH ASSEMBLY

The MICRO SWITCH™ 6AS Series consists of two large premium BZ/BA/BM/BE snap-action switches ganged together and actuated by a single actuator. Operating characteristics are dependent upon the type of individual switches and actuators chosen. Field adjustable operating point on one or both basic switches. Solder, A2, and T-type terminations available, along with straight, roller, and leaf levers. Mounting holes accept pins or screws of 3,53 mm [0.139 in] diameter. Often used for boiler controls or anywhere two circuits need to be controlled by one actuator.

O.F. • Operating force  
 R.F. • Release force  
 O.T. • Overtravel  
 D.T. • Differential travel  
 O.P. • Operating position

6AS Series: Leaf actuator

6AS Series: Roller Lever

OPERATING CHARACTERISTICS

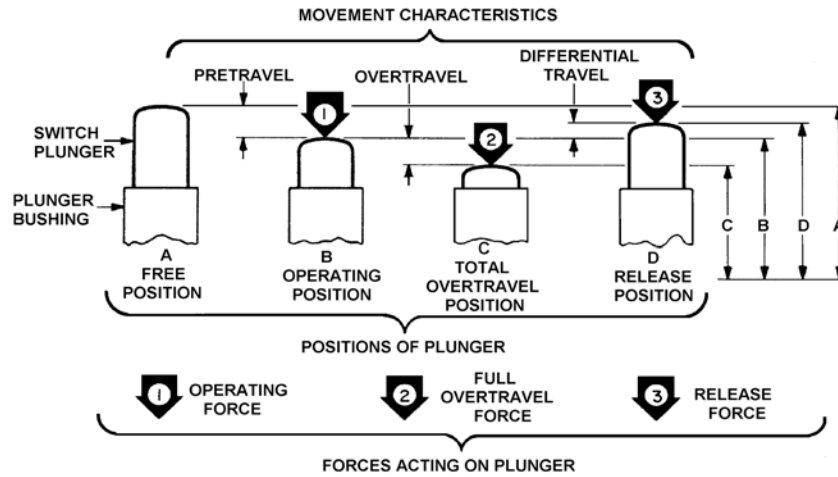

Table 3. Operating Characteristics Definitions

Characteristic	Description
<b>Differential Travel-DT</b>	Plunger or actuator travel from point where contacts “snap-over” to point where they “snap-back.”
<b>Free Position-FP</b>	Position of switch plunger or actuator when no external force is applied.
<b>Full Overtravel Force</b>	Force required to attain full overtravel of actuator.
<b>Operating Position-OP</b>	Position of switch plunger or actuator at which point contacts snap from normal to operated position. With flexible or adjustable actuators, the operating position is measured from the end of the lever or its maximum length. Location of operating position measurement shown on mounting dimension drawings.
<b>Operating Force-OF</b>	Amount of force applied to switch plunger or actuator to cause the contact “snap-over.” Note in the case of adjustable actuators, the force is measured from the maximum length position of the lever.
<b>Overtravel-OT</b>	Plunger or actuator travel safely available beyond operating position.
<b>Pretravel-PT</b>	Distance or angle traveled in moving plunger or actuator from free position to operating position.
<b>Release Force-RF</b>	Amount of force still applied to switch plunger or actuator at the moment contacts snap from operated position to non-operated position.
<b>Total Travel</b>	Distance from actuator free position to overtravel limit position.

## LARGE SNAP-ACTION SWITCH ACCESSORIES

### Brackets

Description	8MA1	8MA2	17MA1-B
			
<b>Description</b>	Adjustable mounting bracket with adjustment slot on left	Adjustable mounting bracket with adjustment slot on right	Conversion mounting bracket
<b>Housing material</b>	Steel	Steel	Corrosion-resistant metal
<b>Measurements</b>	60,2 mm W x 21,3 mm H x 7,4 mm D [2.37 in W x 0.84 in H x 0.29 in D]		66,8 mm W x 19,0 mm D [2.63 in W x 0.75 in D]
<b>Features</b>	sturdy plated steel construction; fast, easy screwdriver adjustment; can be used with most standard basic switches		converts standard basic switches from side to top mount; corrosion resistant; snaps into switch mounting holes without tools

### Die-cast Zinc Enclosures

Description	3PA1	3PA28	3PA2
			
<b>Description</b>	mounted from either side through 3,55 mm [0.140 in] dia. holes on 25,4 mm [1.0 in] centers; conduit/hub 0.5 – 14 NPT internal thread	mounted from either side through 3,55 mm [0.140 in] dia. holes on 25,4 mm [1.0 in] centers. 1/2-14 NPSM internal thread conduit hub	switch secured in enclosure; two 4,37 mm [0.172 in] dia. holes in flange accept #8 screws for mounting on 41,3 mm [1.625 in] centers; conduit/hub 0.5 – 14 NPT internal thread
<b>Housing material</b>	die-cast zinc enclosure (side mount)	die-cast zinc enclosure (side mount)	die-cast zinc enclosure (flange mount)
<b>Measurements</b>	74,8 mm W x 42,9 mm H x 25,4 mm D [2.95 in W x 1.69 in H x 1.00 in D]	74,8 mm W x 42,9 mm H x 25,4 mm D [2.95 in W x 1.69 in H x 1.00 in D]	74,8 mm W x 42,9 mm H x 25,4 mm D [2.95 in W x 1.69 in H x 1.00 in D]
<b>Sealing/Features</b>	NEMA 1; IP 40; protects the switch from physical abuse and personnel from contact with exposed terminals		

### Plastic Thermal Enclosures

Description	5PA1	5PA2	5PA3
			
<b>Description</b>	Plastic terminal enclosure used with solder terminal switches	Plastic terminal enclosure use with screw terminal switches	Plastic terminal enclosure used with either solder or screw terminal switches with auxiliary actuators assembled
<b>Housing material</b>	plastic	plastic	plastic
<b>Measurements</b>	52,8 mm W x 16,1 mm H [2.08 in W x 0.64 in H]	52,8 mm W x 20,2 mm H x 21,0 mm D [2.08 in W x 0.80 in H x 0.83 in D]	52,8 mm W x 20,2 mm H x 21,0 mm D [2.08 in W x 0.80 in H x 0.83 in D]
<b>Sealing/Features</b>	NEMA 1, IP 40; easy to use; screw and solder terminal versions; protect personnel from contact with exposed terminals

### **WARNING**

#### **PERSONAL INJURY**

**DO NOT USE** these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

### **WARNING**

#### **MISUSE OF DOCUMENTATION**

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

## WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell website, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.
