## 3M™ PELTOR™ Earmuffs — X Series Line Extension

Featuring the most advanced technology of the PELTOR™ Earmuffs product line, now all 3M™ PELTOR™ Earmuffs — X Series are electrically insulated to meet the needs of an extensive range of industrial applications. We've also added new models that are ideal for forestry and related industries:

- ▶ Electrically insulated hard hat-attached earmuffs
- ▶ Forestry orange earmuffs

Get the versatility you need at [3M.com/PELTOR](https://www.3m.com/PELTOR).

**PELTOR™**

## 3M™ PELTOR™ Earmuffs — X Series

# X marks the spot for comfortable hearing protection.

Protect your workers with 3M™ PELTOR™ Earmuffs — X Series. Lightweight dual-molded cups offer great comfort without excess weight. They also feature soft, wide cushions to enhance wearability and comfort. It's hearing protection your crew will want to wear.

\*3M recommends fit testing of hearing protectors. Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earmuff fit, earmuff fitting skill and motivation of the user. If NRR is used, 3M recommends that it be reduced by 50% or in accordance with applicable regulations.

\*\* These earmuff cups are made of non-conductive (sometimes referred to as "dielectric") material while the metal components of the headbands and the helmet attachment mechanisms are covered in non-conductive material. This product was found to be electrically insulated, withstanding a voltage up to 1.2 kV, at an external laboratory against a modified test method based on EN 397:2012 under dry conditions. The user must determine the overall suitability of this product for the intended application taking into account any hazards other than noise for which this product is tested and approved.

3M Personal Safety Division products are for occupational use only.
