

BU-26103-*
(Test Probe with 4mm Banana Plug)

DESCRIPTION:

The BU-26103-* is a test probe that has a 4mm un-shrouded banana plug right behind the probe tip. It comes with a removable protective cap that conceals the banana plug during normal probe work. The probe is attached to a standard test lead via the 4mm banana jack built into the tail. This jack accepts shrouded, un-shrouded and retractable banana plugs.
