

RASPBERRY PI / KEYBOARDS & MICE

Mini Chiclet Keyboard – USB Wired – Black

PRODUCT ID: 1736

DESCRIPTION

Add a good quality, slim keyboard to your Raspberry Pi, Beagle Bone Black or other mini-computer with this sleek black chiclet keyboard. It's a full QWERTY keyboard with a USB cable and is compatible with all operating systems. We tried many keyboards to find one that felt good for every-day use and didn't take up too much room.

While it's not as small as our Miniature Microcontroller-Friendly Keyboard, this keyboard will work great with a PC, Mac, Raspberry Pi or Beagle Bone. And it's still pretty small at just 11.1" x 5.2" x .8" (282mm x 131mm x 21mm.)

To use with a Raspberry Pi, change the keyboard to USA PC104 layout:

- Switch to root user.
- Run 'dpkg-reconfigure locales' and change from en_GB.UTF-8 to en_US.UTF-8.
- Run 'dpkg-reconfigure keyboard-configuration' and change the keyboard to USA PC104 (again, change as needed).
