

# LTC6957-1/LTC6957-2

## Low Phase Noise, Dual LVPECL or LVDS Output Buffer/Driver/Logic Converter

### DESCRIPTION

Demonstration Circuit 1765A features the [LTC®6957-1/LTC6957-2](#), a low phase noise, dual LVPECL or LVDS output buffer/driver/logic converter.

The DC1765A provides 0.5" spaced SMA connectors for the differential inputs and outputs. The inputs are terminated to on-board 50Ω resistors. The LVPECL outputs of the DC1765A-A are individually biased through 130Ω resistors to ground and then AC-coupled. The transmission lines are 50Ω, making the outputs suitable to drive 50Ω input impedance instruments. The LVDS outputs of the DC1765A-B are terminated with 100Ω differential

and are DC-coupled. The DC1765A allows the user to take advantage of the shutdown and bandwidth selection features of the LTC6957. The DC1765A can operate with a single-ended or differential sine wave or square-wave input signal. Supply the DC1765A with 3.3V and it is ready to function. The DC1765A offers extra component population options to make it compatible with different logic signal types.

**Design files for this circuit board are available at <http://www.linear.com/demo>**

Figure 1. DC1765A Inputs and Outputs

## QUICK START PROCEDURE

The DC1765A is very straightforward to operate. Refer to Figure 1 for the following discussion.

### DC1765A Configuration

1. Apply a low-noise and low-spurious 3.3V supply between the V+ (E1) and GND (E2) turrets.
2. Connect a low phase-noise (or jitter) single-ended or differential input signal to IN+ (J1) and/or IN- (J2) SMA connectors. Refer to the LTC6957 data sheet for appropriate input signal types and levels.
3. Connect either of the outputs (OUT1, J3 and J4 or OUT2, J5 and J6) to a high-speed scope, spectrum analyzer or a signal analyzer to start the evaluation of the LTC6957.
4. Configure the input bandwidth of the LTC6957 with the use of FILTA (JP1) and FILTB (JP2) jumpers. Follow the instructions given in the LTC6957 data sheet to choose the correct bandwidth given an input signal.
5. Shut down an unused output by using jumper SD1 (JP3) to shutdown OUT1 or jumper SD2 (JP4) to shutdown OUT2.

### DC1765A Reconfiguration

The DC1765A is flexible and allows the connectivity of a variety of input and output signal types. The DC1765A is configured as shown in the schematic diagram. However, the DC1765A allows the installation of different input and output configurations to adapt to a variety of logic signals. Refer to the Applications Information section of the LTC6957 data sheet for all possible connectivity options that can be implemented by modifying the DC1765A.

## ASSEMBLY OPTIONS

Table 1. DC1765A Assembly Options

ASSEMBLY VERSION	PART NUMBER	OUTPUT TYPE
DC1765A-A	LTC6957HMS-1	LVPECL
DC1765A-B	LTC6957HMS-2	LVDS

## LAYOUT TOP LAYER

The top metal layer of the DC1765A is shown here as an example of good PCB layout for the LTC6957-1/LTC6957-2.

## DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

**Please read the DEMO BOARD manual prior to handling the product.** Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
