

## Description

Single, two and three pole rocker switch/thermal trip free circuit breakers (S-type TO CBE to EN 60934) of compact design for snap-in panel mounting. Available either with protection on one/both/all poles or, in the case of the double pole version, protection on one pole only. Illumination is optional and there is a choice of rocker colours. Approved to CBE standard EN 60934 (IEC 60934).

## Typical applications

Motors, transformers, solenoids, household and office machines, electrical tools, mobile homes, boating, construction vehicles, medical equipment to EN 60601.

## Typical time/current characteristics

Multipole types: all poles symmetrically loaded.  
With single pole overload, thermal tripping will be at approx.  $1.54 \times I_N$  with 2-pole devices and at approx.  $1.68 \times I_N$  with 3-pole devices.

### 0.1...2 A

### 2.5...20 A 1-pole 2.5...16 A 2- and 3-pole

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section Technical information.

Ambient temperature	°F	-22	-4	+14	+32	+73.4	+104	+122	+140

## Description

The appliance inlet module X3130 with double pole circuit breaker 3130-FA.A combines three functions within a single component: A C14 appliance inlet and rocker switch with resettable overcurrent protection; screw mounting from the front or the rear.

## Typical applications

Electrical medical apparatus, laboratory equipment, professional audio equipment and office machines.
