2-Port HDMI to VGA + Audio Adapter / Splitter, 1920 x 1080 (1080p), TAA

MODEL NUMBER: **P131-06N-2VA-U**

Converts and splits an HDMI audio/video signal for display on 2 VGA monitors or projectors at the same time. Ideal for offices, conference rooms, retail settings, trade shows and classrooms.

Description

The P131-06N-2VA-U 2-Port HDMI to VGA + Audio Splitter converts and splits an HDMI audio/video signal for display on two VGA-enabled monitors or projectors at the same time. Ideal for offices, conference rooms, retail settings, trade shows and classrooms, this compact splitter features a built-in HDMI cable that connects to the source. It lets you use your existing VGA displays instead of buying new HDMI monitors or televisions.

The P131-06N-2VA-U supports video resolutions up to 1920 x 1080, including 1080p, as well as HDCP, EDID and 3D. The HDMI audio signal passes through the adapter and splits to two 3.5 mm stereo jacks. Orange LEDs next to each output port indicate whether the splitter is powered on and transmitting a signal to the connected displays.

The splitter works with all operating systems and is small enough to carry in your backpack or computer bag. Plug-and-play convenience means no software or drivers are needed. An included USB Micro-B cable connects between the source and the splitter to provide power, so no external power supply is required.

Features

Converts and Splits HDMI Signal to 2 VGA Displays at the Same Time

- Ideal for offices, conference rooms, retail settings, trade shows and classrooms
- Built-in HDMI cable connects to audio/video source
- Included USB Micro-B cable supplies power to splitter
